## **Essential Windows CMD Commands You Should Know**

The Command Prompt is your gateway to advanced Windows tools. Here are all the essential CMD commands in a cheat sheet.

BY JOE KEELEY
UPDATED JUN 18, 2021

The Windows Command Prompt may seem daunting, with its simple interface that lacks the usual Windows help tips, but it's actually one of the most powerful instruments in the Windows arsenal.

The Command Prompt on Windows 10 is useful for everything from complex automation to network configuration. What it lacks in interface it more than makes up for in effectiveness. If you don't know where to start with command prompt proficiency, what better place than to start here!

While most seek the best and most useful commands immediately, it helps to gloss over what different parameters mean. Proficiency with your Command Prompt comes not only through having a lexicon of commands, but of understanding what each parameter means and how different parameters can be combined to achieve a desired effect as well.

The following is a comprehensive list of the most essential Windows commands.

**FREE DOWNLOAD:** This cheat sheet is available as a **downloadable PDF** from our distribution partner, TradePub. You will have to complete a short form to access it for the first time only. Download the **Essential Windows CMD Commands Cheat Sheet**.

## **Essential Windows Command Prompt Commands**

ASSOC Displays or modifies file extension associations.  ATTRIB Displays or changes file attributes.  BREAK Sets or clears extended CTRL+C checking.  BCDBOOT Used to copy critical files to the system partition and to create a new system BCD store.  BCDEDIT Sets properties in boot database to control boot loading.  CACLS Shows or changes access control lists (ACLs) of files.  CALL Calls a batch program from another.  CD Shows the name of or changes to a current directory.  CHCP Displays or sets the active code page number.  CHDIR Displays or sets the active code page number.  CHKDSK Checks a disk and displays a status report.  CHKNTS Displays or modifies the checking of disk at boot time.  CHOICE Batch file command that allows users to select from a set of options.  CIPHER Displays or alters the encryption of directories (files) on NTFS partitions.  CLIP Redirects output off another command to the Windows clipboard.  CLIP Clears the screen.  CMD Starts a new instance of the Windows command interpreter.  CMDKEY Creates, lists, and deletes stored usernames and passwords or credentials.  COLOR Sets the default console colors.  COMPACT Displays or alters the compression of files on NTSF partitions.  COMPACT Displays or alters the compression of files on NTSF partitions.  COPY Copies one of more files to another location.  DATE Displays or sets the date.  DEFRAG Disk defragment accessory.  DEL Deletes one or more files.  DIR Displays a list of files and sub-directories in a directory.  DISKCOMP Compares the contents of two floppy disks.	COMMAND	RESULT
BREAK Sets or clears extended CTRL+C checking.  BCDBOOT Used to copy critical files to the system partition and to create a new system BCD store.  BCDEDIT Sets properties in boot database to control boot loading.  CACLS Shows or changes access control lists (ACLs) of files.  CALL Calls a batch program from another.  CD Shows the name of or changes to a current directory.  CHCP Displays or sets the active code page number.  CHDIR Displays the name of or changes to the current directory.  CHKDSK Checks a disk and displays a status report.  CHKINTFS Displays or modifies the checking of disk at boot time.  CHOICE Batch file command that allows users to select from a set of options.  CIPHER Displays or alters the encryption of directories (files) on NTFS partitions.  CLIP Redirects output off another command to the Windows clipboard.  CLS Clears the screen.  CMD Starts a new instance of the Windows command interpreter.  CMDKEY Creates, lists, and deletes stored usernames and passwords or credentials.  COLOR Sets the default console colors.  COMP Compares the contents of two files or sets of files byte by byte  COMPACT Displays or alters the compression of files on NTSF partitions.  CONYERT Converts FAT volumes to NTFS. You cannot convert the current drive.  COPY Copies one of more files to another location.  DATE Displays or sets the date.  DEFRAG Disk defragment accessory.  DEL Deletes one or more files.  DIR Displays a list of files and sub-directories in a directory.  DISKCOMP Compares the contents of two floppy disks.	ASSOC	Displays or modifies file extension associations.
BCDBOOT Used to copy critical files to the system partition and to create a new system BCD store.  BCDEDIT Sets properties in boot database to control boot loading.  CACLS Shows or changes access control lists (ACLs) of files.  CALL Calls a batch program from another.  CD Shows the name of or changes to a current directory.  CHCP Displays or sets the active code page number.  CHDIR Displays the name of or changes to the current directory.  CHKDSK Checks a disk and displays a status report.  CHKITS Displays or modifies the checking of disk at boot time.  CHOICE Batch file command that allows users to select from a set of options.  CIPHER Displays or alters the encryption of directories (files) on NTFS partitions.  CLIP Redirects output off another command to the Windows clipboard.  CLS Clears the screen.  CMD Starts a new instance of the Windows command interpreter.  CMDKEY Creates, lists, and deletes stored usernames and passwords or credentials.  COLOR Sets the default console colors.  COMP Compares the contents of two files or sets of files byte by byte  COMPACT Displays or alters the compression of files on NTSF partitions.  CONVERT Converts FAT volumes to NTFS. You cannot convert the current drive.  COPY Copies one of more files to another location.  DATE Displays or sets the date.  DEFRAG Disk defragment accessory.  DEL Deletes one or more files.  DIR Displays a list of files and sub-directories in a directory.  DISKCOMP Compares the contents of two floppy disks.	ATTRIB	Displays or changes file attributes.
BCDEDIT Sets properties in boot database to control boot loading.  CACLS Shows or changes access control lists (ACLs) of files.  CALL Calls a batch program from another.  CD Shows the name of or changes to a current directory.  CHCP Displays or sets the active code page number.  CHDIR Displays the name of or changes to the current directory.  CHKDSK Checks a disk and displays a status report.  CHKNTFS Displays or modifies the checking of disk at boot time.  CHOICE Batch file command that allows users to select from a set of options.  CIPHER Displays or alters the encryption of directories (files) on NTFS partitions.  CLIP Redirects output off another command to the Windows clipboard.  CLS Clears the screen.  CMD Starts a new instance of the Windows command interpreter.  CMDKEY Creates, lists, and deletes stored usernames and passwords or credentials.  COLOR Sets the default console colors.  COMP Compares the contents of two files or sets of files byte by byte  COMPACT Displays or alters the compression of files on NTSF partitions.  CONVERT Converts FAT volumes to NTFS. You cannot convert the current drive.  COPY Copies one of more files to another location.  DATE Displays or sets the date.  DEFRAG Disk defragment accessory.  DEL Deletes one or more files.  DIR Displays a list of files and sub-directories in a directory.  DISKCOMP Compares the contents of two floppy disks.	BREAK	Sets or clears extended CTRL+C checking.
CACLS Shows or changes access control lists (ACLs) of files.  CALL Calls a batch program from another.  CD Shows the name of or changes to a current directory.  CHCP Displays or sets the active code page number.  CHDIR Displays the name of or changes to the current directory.  CHKDSK Checks a disk and displays a status report.  CHKNTFS Displays or modifies the checking of disk at boot time.  CHOICE Batch file command that allows users to select from a set of options.  CIPHER Displays or alters the encryption of directories (files) on NTFS partitions.  CLIP Redirects output off another command to the Windows clipboard.  CLS Clears the screen.  CMD Starts a new instance of the Windows command interpreter.  CMDKEY Creates, lists, and deletes stored usernames and passwords or credentials.  COLOR Sets the default console colors.  COMP Compares the contents of two files or sets of files byte by byte  COMPACT Displays or alters the compression of files on NTSF partitions.  CONVERT Converts FAT volumes to NTFS. You cannot convert the current drive.  COPY Copies one of more files to another location.  DATE Displays or sets the date.  DEFRAG Disk defragment accessory.  DEL Deletes one or more files.  DIR Displays a list of files and sub-directories in a directory.  DISKCOMP Compares the contents of two floppy disks.	BCDBOOT	Used to copy critical files to the system partition and to create a new system BCD store.
CALL Calls a batch program from another.  CD Shows the name of or changes to a current directory.  CHCP Displays or sets the active code page number.  CHDIR Displays the name of or changes to the current directory.  CHKDSK Checks a disk and displays a status report.  CHKNTFS Displays or modifies the checking of disk at boot time.  CHOICE Batch file command that allows users to select from a set of options.  CIPHER Displays or alters the encryption of directories (files) on NTFS partitions.  CLIP Redirects output off another command to the Windows clipboard.  CLS Clears the screen.  CMD Starts a new instance of the Windows command interpreter.  CMDKEY Creates, lists, and deletes stored usernames and passwords or credentials.  COLOR Sets the default console colors.  COMP Compares the contents of two files or sets of files byte by byte  COMPACT Displays or alters the compression of files on NTSF partitions.  CONVERT Converts FAT volumes to NTFS. You cannot convert the current drive.  COPY Copies one of more files to another location.  DATE Displays or sets the date.  DEFRAG Disk defragment accessory.  DEL Deletes one or more files.  DIR Displays a list of files and sub-directories in a directory.  DISKCOMP Compares the contents of two floppy disks.	BCDEDIT	Sets properties in boot database to control boot loading.
CD Shows the name of or changes to a current directory.  CHCP Displays or sets the active code page number.  CHDIR Displays the name of or changes to the current directory.  CHKDSK Checks a disk and displays a status report.  CHKNTFS Displays or modifies the checking of disk at boot time.  CHOICE Batch file command that allows users to select from a set of options.  CIPHER Displays or alters the encryption of directories (files) on NTFS partitions.  CLIP Redirects output off another command to the Windows clipboard.  CLS Clears the screen.  CMD Starts a new instance of the Windows command interpreter.  CMDKEY Creates, lists, and deletes stored usernames and passwords or credentials.  COLOR Sets the default console colors.  COMP Compares the contents of two files or sets of files byte by byte  COMPACT Displays or alters the compression of files on NTSF partitions.  CONVERT Converts FAT volumes to NTFS. You cannot convert the current drive.  COPY Copies one of more files to another location.  DATE Displays or sets the date.  DEFRAG Disk defragment accessory.  DEL Deletes one or more files.  DIR Displays a list of files and sub-directories in a directory.  DISKCOMP Compares the contents of two floppy disks.	CACLS	Shows or changes access control lists (ACLs) of files.
CHCP Displays or sets the active code page number.  CHDIR Displays the name of or changes to the current directory.  CHKDSK Checks a disk and displays a status report.  CHKNTFS Displays or modifies the checking of disk at boot time.  CHOICE Batch file command that allows users to select from a set of options.  CIPHER Displays or alters the encryption of directories (files) on NTFS partitions.  CLIP Redirects output off another command to the Windows clipboard.  CLS Clears the screen.  CMD Starts a new instance of the Windows command interpreter.  CMDKEY Creates, lists, and deletes stored usernames and passwords or credentials.  COLOR Sets the default console colors.  COMP Compares the contents of two files or sets of files byte by byte  COMPACT Displays or alters the compression of files on NTSF partitions.  CONVERT Converts FAT volumes to NTFS. You cannot convert the current drive.  COPY Copies one of more files to another location.  DATE Displays or sets the date.  DEFRAG Disk defragment accessory.  DEL Deletes one or more files.  DIR Displays a list of files and sub-directories in a directory.  DISKCOMP Compares the contents of two floppy disks.	CALL	Calls a batch program from another.
CHDIR Displays the name of or changes to the current directory.  CHKDSK Checks a disk and displays a status report.  CHKNTFS Displays or modifies the checking of disk at boot time.  CHOICE Batch file command that allows users to select from a set of options.  CIPHER Displays or alters the encryption of directories (files) on NTFS partitions.  CLIP Redirects output off another command to the Windows clipboard.  CLS Clears the screen.  CMD Starts a new instance of the Windows command interpreter.  CMDKEY Creates, lists, and deletes stored usernames and passwords or credentials.  COLOR Sets the default console colors.  COMP Compares the contents of two files or sets of files byte by byte  COMPACT Displays or alters the compression of files on NTSF partitions.  CONVERT Converts FAT volumes to NTFS. You cannot convert the current drive.  COPY Copies one of more files to another location.  DATE Displays or sets the date.  DEFRAG Disk defragment accessory.  DEL Deletes one or more files.  DIR Displays a list of files and sub-directories in a directory.  DISKCOMP Compares the contents of two floppy disks.	CD	Shows the name of or changes to a current directory.
CHKDSK Checks a disk and displays a status report.  CHKNTFS Displays or modifies the checking of disk at boot time.  CHOICE Batch file command that allows users to select from a set of options.  CIPHER Displays or alters the encryption of directories (files) on NTFS partitions.  CLIP Redirects output off another command to the Windows clipboard.  CLS Clears the screen.  CMD Starts a new instance of the Windows command interpreter.  CMDKEY Creates, lists, and deletes stored usernames and passwords or credentials.  COLOR Sets the default console colors.  COMP Compares the contents of two files or sets of files byte by byte  COMPACT Displays or alters the compression of files on NTSF partitions.  CONVERT Converts FAT volumes to NTFS. You cannot convert the current drive.  COPY Copies one of more files to another location.  DATE Displays or sets the date.  DEFRAG Disk defragment accessory.  DEL Deletes one or more files.  DIR Displays a list of files and sub-directories in a directory.  DISKCOMP Compares the contents of two floppy disks.	CHCP	Displays or sets the active code page number.
CHKNTFS Displays or modifies the checking of disk at boot time.  CHOICE Batch file command that allows users to select from a set of options.  CIPHER Displays or alters the encryption of directories (files) on NTFS partitions.  CLIP Redirects output off another command to the Windows clipboard.  CLS Clears the screen.  CMD Starts a new instance of the Windows command interpreter.  CMDKEY Creates, lists, and deletes stored usernames and passwords or credentials.  COLOR Sets the default console colors.  COMP Compares the contents of two files or sets of files byte by byte  COMPACT Displays or alters the compression of files on NTSF partitions.  CONVERT Converts FAT volumes to NTFS. You cannot convert the current drive.  COPY Copies one of more files to another location.  DATE Displays or sets the date.  DEFRAG Disk defragment accessory.  DEL Deletes one or more files.  DIR Displays a list of files and sub-directories in a directory.  DISKCOMP Compares the contents of two floppy disks.	CHDIR	Displays the name of or changes to the current directory.
CHOICE Batch file command that allows users to select from a set of options.  CIPHER Displays or alters the encryption of directories (files) on NTFS partitions.  CLIP Redirects output off another command to the Windows clipboard.  CLS Clears the screen.  CMD Starts a new instance of the Windows command interpreter.  CMDKEY Creates, lists, and deletes stored usernames and passwords or credentials.  COLOR Sets the default console colors.  COMP Compares the contents of two files or sets of files byte by byte  COMPACT Displays or alters the compression of files on NTSF partitions.  CONVERT Converts FAT volumes to NTFS. You cannot convert the current drive.  COPY Copies one of more files to another location.  DATE Displays or sets the date.  DEFRAG Disk defragment accessory.  DEL Deletes one or more files.  DIR Displays a list of files and sub-directories in a directory.  DISKCOMP Compares the contents of two floppy disks.	CHKDSK	Checks a disk and displays a status report.
CIPHER  Displays or alters the encryption of directories (files) on NTFS partitions.  CLIP  Redirects output off another command to the Windows clipboard.  CLS  Clears the screen.  CMD  Starts a new instance of the Windows command interpreter.  CMDKEY  Creates, lists, and deletes stored usernames and passwords or credentials.  COLOR  Sets the default console colors.  COMP  Compares the contents of two files or sets of files byte by byte  COMPACT  Displays or alters the compression of files on NTSF partitions.  CONVERT  Converts FAT volumes to NTFS. You cannot convert the current drive.  COPY  Copies one of more files to another location.  DATE  Displays or sets the date.  DEFRAG  Disk defragment accessory.  DEL  Deletes one or more files.  DIR  Displays a list of files and sub-directories in a directory.  DISKCOMP  Compares the contents of two floppy disks.	CHKNTFS	Displays or modifies the checking of disk at boot time.
CLIP Redirects output off another command to the Windows clipboard.  CLS Clears the screen.  CMD Starts a new instance of the Windows command interpreter.  CMDKEY Creates, lists, and deletes stored usernames and passwords or credentials.  COLOR Sets the default console colors.  COMP Compares the contents of two files or sets of files byte by byte  COMPACT Displays or alters the compression of files on NTSF partitions.  CONVERT Converts FAT volumes to NTFS. You cannot convert the current drive.  COPY Copies one of more files to another location.  DATE Displays or sets the date.  DEFRAG Disk defragment accessory.  DEL Deletes one or more files.  DIR Displays a list of files and sub-directories in a directory.  DISKCOMP Compares the contents of two floppy disks.	CHOICE	Batch file command that allows users to select from a set of options.
CLS Clears the screen.  CMD Starts a new instance of the Windows command interpreter.  CMDKEY Creates, lists, and deletes stored usernames and passwords or credentials.  COLOR Sets the default console colors.  COMP Compares the contents of two files or sets of files byte by byte  COMPACT Displays or alters the compression of files on NTSF partitions.  CONVERT Converts FAT volumes to NTFS. You cannot convert the current drive.  COPY Copies one of more files to another location.  DATE Displays or sets the date.  DEFRAG Disk defragment accessory.  DEL Deletes one or more files.  DIR Displays a list of files and sub-directories in a directory.  DISKCOMP Compares the contents of two floppy disks.	CIPHER	Displays or alters the encryption of directories (files) on NTFS partitions.
CLS Clears the screen.  CMD Starts a new instance of the Windows command interpreter.  CMDKEY Creates, lists, and deletes stored usernames and passwords or credentials.  COLOR Sets the default console colors.  COMP Compares the contents of two files or sets of files byte by byte  COMPACT Displays or alters the compression of files on NTSF partitions.  CONVERT Converts FAT volumes to NTFS. You cannot convert the current drive.  COPY Copies one of more files to another location.  DATE Displays or sets the date.  DEFRAG Disk defragment accessory.  DEL Deletes one or more files.  DIR Displays a list of files and sub-directories in a directory.  DISKCOMP Compares the contents of two floppy disks.		
CMDKEY Creates, lists, and deletes stored usernames and passwords or credentials.  COLOR Sets the default console colors.  COMP Compares the contents of two files or sets of files byte by byte  COMPACT Displays or alters the compression of files on NTSF partitions.  CONVERT Converts FAT volumes to NTFS. You cannot convert the current drive.  COPY Copies one of more files to another location.  DATE Displays or sets the date.  DEFRAG Disk defragment accessory.  DEL Deletes one or more files.  DIR Displays a list of files and sub-directories in a directory.  DISKCOMP Compares the contents of two floppy disks.	CLIP	Redirects output off another command to the Windows clipboard.
CMDKEY Creates, lists, and deletes stored usernames and passwords or credentials.  COLOR Sets the default console colors.  COMP Compares the contents of two files or sets of files byte by byte  COMPACT Displays or alters the compression of files on NTSF partitions.  CONVERT Converts FAT volumes to NTFS. You cannot convert the current drive.  COPY Copies one of more files to another location.  DATE Displays or sets the date.  DEFRAG Disk defragment accessory.  DEL Deletes one or more files.  DIR Displays a list of files and sub-directories in a directory.  DISKCOMP Compares the contents of two floppy disks.	CLS	Clears the screen.
COLOR Sets the default console colors.  COMP Compares the contents of two files or sets of files byte by byte  COMPACT Displays or alters the compression of files on NTSF partitions.  CONVERT Converts FAT volumes to NTFS. You cannot convert the current drive.  COPY Copies one of more files to another location.  DATE Displays or sets the date.  DEFRAG Disk defragment accessory.  DEL Deletes one or more files.  DIR Displays a list of files and sub-directories in a directory.  DISKCOMP Compares the contents of two floppy disks.	CMD	Starts a new instance of the Windows command interpreter.
COMPACT Displays or alters the compression of files on NTSF partitions.  CONVERT Converts FAT volumes to NTFS. You cannot convert the current drive.  COPY Copies one of more files to another location.  DATE Displays or sets the date.  DEFRAG Disk defragment accessory.  DEL Deletes one or more files.  DIR Displays a list of files and sub-directories in a directory.  DISKCOMP Compares the contents of two floppy disks.	CMDKEY	Creates, lists, and deletes stored usernames and passwords or credentials.
COMPACT Displays or alters the compression of files on NTSF partitions.  CONVERT Converts FAT volumes to NTFS. You cannot convert the current drive.  COPY Copies one of more files to another location.  DATE Displays or sets the date.  DEFRAG Disk defragment accessory.  DEL Deletes one or more files.  DIR Displays a list of files and sub-directories in a directory.  DISKCOMP Compares the contents of two floppy disks.	COLOR	Sets the default console colors.
CONVERT Converts FAT volumes to NTFS. You cannot convert the current drive.  COPY Copies one of more files to another location.  DATE Displays or sets the date.  DEFRAG Disk defragment accessory.  DEL Deletes one or more files.  DIR Displays a list of files and sub-directories in a directory.  DISKCOMP Compares the contents of two floppy disks.	COMP	Compares the contents of two files or sets of files byte by byte
COPY Copies one of more files to another location.  DATE Displays or sets the date.  DEFRAG Disk defragment accessory.  DEL Deletes one or more files.  DIR Displays a list of files and sub-directories in a directory.  DISKCOMP Compares the contents of two floppy disks.	COMPACT	Displays or alters the compression of files on NTSF partitions.
DATE Displays or sets the date.  DEFRAG Disk defragment accessory.  DEL Deletes one or more files.  DIR Displays a list of files and sub-directories in a directory.  DISKCOMP Compares the contents of two floppy disks.	CONVERT	Converts FAT volumes to NTFS. You cannot convert the current drive.
DEFRAG Disk defragment accessory.  DEL Deletes one or more files.  DIR Displays a list of files and sub-directories in a directory.  DISKCOMP Compares the contents of two floppy disks.	COPY	Copies one of more files to another location.
DEL Deletes one or more files.  DIR Displays a list of files and sub-directories in a directory.  DISKCOMP Compares the contents of two floppy disks.	DATE	Displays or sets the date.
DIR Displays a list of files and sub-directories in a directory.  DISKCOMP Compares the contents of two floppy disks.	DEFRAG	Disk defragment accessory.
DISKCOMP Compares the contents of two floppy disks.	DEL	Deletes one or more files.
	DIR	Displays a list of files and sub-directories in a directory.
DISKCOPY Copies the contents of one floppy disk to another.	DISKCOMP	Compares the contents of two floppy disks.
	DISKCOPY	Copies the contents of one floppy disk to another.

PISKPARTD	Displays or configures Disk Partition properties.
DOSKEY	Edits command lines, recalls Windows commands, and creates macros.
DRIVERQUERY	Displays current device driver status and properties.
ECHO	Displays messages, or turns commands echoing on or off.
ENDLOCAL	Ends localization of <b>environment</b> changes in a batch file.
ERASE	Deletes one of more files.
EXIT	Quits and closes the command shell.
EXPAND	Expands compressed files.
FC	Compares two files or sets of files and displays the differences between them.
FIND	Searches for a text string in a file or files.
FINDSTR	Searches for strings in files.
FOR	Runs a specified command for each item in a set.
FORFILES	Selects files in a folder for batch processing.
FORMAT	Formats a disc for use with Windows.
FSUTIL	Displays or configures the file system properties.
FTYPE	Displays or modifies file types used in file extensions associations.
GOTO	Directs the Windows command interpreter to a labeled line in a batch program.
GPRESULT	Displays Group Policy Information for machine or user.
GRAFTABL	Enables Windows to display an extended character set in graphics mode.
HELP	Provides help information for Windows commands.
ICACLS	Display, modify, backup, or restore ACLs for files and directories.
IF	Performs conditional processing in batch programs.

IPCONFIG	Displays all current TCP/IP network configuration values.
LABEL	Creates, changes, or deletes the volume label of a disk.
MD	Creates a directory.
MKDIR	Creates a directory.
MKLINK	Creates Symbolic Links and Hard Links.
MODE	Configures a system device.
MORE	Displays output one screen at a time.
MOVE	Moves one or more files from one directory to another directory.
OPENFILES	Queries, displays, or disconnects open files or files opened by network users.
PATH	Displays or sets a search path for executable files.
PAUSE	Suspends processing of a batch file.
POPD	Restores the previous value of the current directory saved by PUSHD.
PRINT	Prints a text file.
PROMPT	Changes the Windows command prompt.
PUSHD	Saves the current directory then changes it.

ROMMAND	Removes a directory.
RECOVER	Recovers readable information from a bad or defective disk.
REM	Designates comments (remarks) in batch files.
REN	Renames a file or files.
RENAME	Renames a file or files.
REPLACE	Replaces files.
RMDIR	Removes a directory.
ROBOCOPY	Advanced utility to copy files and directory trees.
SET	Displays, sets, or removes <b>environment</b> variables for current session.
SETLOCAL	Begins localization of <b>environment</b> changes in a batch file.
SETX	Sets environment variables.
SC	Displays or configures services (background processes).
SCHTASKS	Schedules commands and programs to run on a computer.
SHIFT	Shifts the position of replaceable parameters in batch files.
SHUTDOWN	Allows proper local or remote shutdown of machine.
SORT	Sorts input.
START	Starts a separate window to run a specified programs or command.
SUBST	Associates a path with a drive letter.
SYSTEMINFO	Displays machine specific properties and configuration.
TAKEOWN	Allows an administrator to take ownership of a file.
TASKLIST	Displays all currently running tasks including services.
TASKKILL	Kill running process or applications.

TIME	Displays or sets the system time.
TIMEOUT	Pauses the command processor for the specified number of seconds.
TITLE	Sets the window title for a CMD.EXE session.
TREE	Graphically displays the directory structure of a drove or path.
TYPE	Displays the contents of a text file.
VER	Displays the Windows version.
VERIFY	Tells Windows whether or verify that your files are written correctly to a disk.
VOL	Displays a disk volume label and serial number.
VSSADMIN	Volume Shadow Copy Service administration tool.
WHERE	Displays the locations of files that match a search pattern.
WMIC	Displays WMI information inside interactive command shell.
XCOPY	Copies files and directory trees.

## **Dive Deeper With the Windows Command Prompt**
